FEATURES LIST 2017

SPRING

FLAVOURINGS AND SEASONINGS

How are consumer preferences shaping up in different markets and how do these tie in with wider trends, such as health or provenance?

ROBOTICS

Secondary packaging has been at the forefront of robotics in snack making. What's the latest and where else throughout snacks production are robots making their mark?

SUPPLY CHAIN MANAGEMENT

Optimising supply chains between manufacturers and retailers can reduce food miles, fuel bills and other costs. It can also involve tapping into the latest technologies and working together with logistics providers more closely than previously.

NUTS AND GOOD FATS

Nuts contain high levels of healthy fats, but these same fats can make nuts appear less healthy at first glance under the crude, colour-coded food labelling schemes emerging in markets such as the UK and France. So what's the impact, and what's the latest evidence for the benefits of good fats?

PROFILE

SUMMER

SNACKEX

SNACKEX SHOW GUIDE

Find out what's what and who's who in Vienna with our rundown of upcoming conference and exhibition highlights and full listing of exhibitors and speakers.

CONVEYING

Streamlined processes require effective and gentle ingredient and product handling.

THE CIRCULAR ECONOMY

Can clamping down on food waste, hitting recycling targets and extending the responsibility of producers to deal with waste from their products help to close the circle of sustainability?

PROTEIN

Can snack makers deliver the level of protein required to make successful nutrition claims in Europe? What are the ingredients they're using to do so? Is it all about beans and pulses or are other ideas being added to the mix?

PROFILE: Austria

AUTUMN

EUROPEAN SNACKS REPORT

Our annual review takes a snapshot of the state of the industry.

COUNTRY OF ORIGIN LABELLING

We take a look at the various private and national schemes around Europe on voluntary country of origin labelling (VCOOL).

OVEN TECHNOLOGIES

We take a look at the latest tech for baking, browning, air popping and drying.

MARKETING TO KIDS

The savoury snacks industry has already reduced its marketing to children under the EU Pledge, but we aim to find out whether the latest review of the audio-visual media services directive means the goalposts are shifting.

SNACKEX REPORT

You'd have been daft to miss it, but here's the next best thing.

WINTER

SNACK PELLETS

Pellet suppliers help manufacturers tap into new market opportunities with unrivalled versatility.

DRIVES AND MOTORS

Rotating machinery such as pumps and fans are the beating heart of snacks production. How can users ensure they adopt the most reliable and energy efficient drive technologies?

SORTING AND INSPECTION

The only way is up for product quality and safety, with evolving sorting and inspection technologies emerging to enable ever greater security.

THE MILLENNIALS HAVE ARRIVED

Many millennials prefer snacking to eating conventional meals but that also means they're on the lookout for healthier options. We discuss how to engage young adults with innovative products.
