MAGAZINE

## FEATURES LIST 2018

### SPRING

#### INSIGHT

##### FOP LABELLING

Some of the world's biggest food companies are preparing to follow the UK with traffic light labelling and change is afoot in the French market. We check out the latest thinking on FOP nutrition labelling.

#### PROCESS

##### FLAVOUR APPLICATION

Flavours and seasonings can be among the most expensive savoury snack ingredients, so it's important to ensure they end up where they're needed - on the snacks.

#### PROCESS

##### PROCESS MEASUREMENT

We check out some of the latest technologies for maintaining quality and consistency throughout the production process.

#### INSIGHT

##### LEARNING THE LESSONS OF EPOXYDECENAL

Despite having been approved for use around the world for decades, safety concerns over this flavouring led to products being withdrawn virtually overnight. Savoury snack makers must work together to ensure that we're not caught out like this in future.

#### PROFILE

### SUMMER

#### INSIGHT

##### PROTECT YOUR REPUTATION

Even the most responsible companies can unexpectedly find themselves the target of scare campaigns. How can they defend their hard-won reputations?

#### PROCESS

##### EFFECTIVE OIL MANAGEMENT

Big potential savings can be achieved through good fryer design and the inclusion of oil purification systems.

#### PROCESS

##### PREDICTIVE MAINTENANCE

Condition monitoring could yield huge savings in maintenance and downtime throughout the savoury snacks industry, but it has been difficult and expensive to implement until now. A new generation of smarter, cost-effective systems could bust the market wide open.

#### INSIGHT

##### LEARNING THE LESSONS FROM BLANCHED PEANUTS

The savoury snacks industry narrowly avoided the imposition of far higher tariffs on blanched peanuts in 2017. How did we manage it and what can we learn?

#### PROFILE

### AUTUMN

#### INSIGHT

##### ACRYLAMIDE

We look at the latest regulatory developments and how we have responded as an industry.

#### PROCESS

##### SECONDARY PACKAGING AND END-OF-LINE

From cartons to pallets, we consider how increasing automation and versatility is evolving operations at the end of the line

#### INSIGHT

##### TWO-TRACK EUROPE?

Are consumers in Eastern Europe right to be concerned about companies offering branded products made to different nutritional compositions in different markets?

#### PROCESS

##### POTATO PROCESSING

From goods-in until they hit the fryer, we look at how the key steps in handling potatoes help optimise efficiency and productivity.

#### PROFILE

##### EUROPEAN SNAPSHOT

A concise look at progress around the savoury snacks markets of Europe.

### WINTER

#### INSIGHT

##### INDUSTRY 4.0

The so-called Internet of Things is here. How will it transform our industry?

#### PROCESS

##### EXTRUSION

We look at the latest developments in this vital, versatile processing step.

#### INSIGHT

##### ADVERTISING AND THE AVMS DIRECTIVE

Always a thorny topic, what are the latest rules governing advertising and how is industry responding?

#### INSIGHT

##### PACKAGING DESIGN

With impulse accounting for a big chunk of savoury snack purchases, packaging needs to stand out on shelf and promote brand identity effectively. We look at the latest trends.

#### PROFILE

**PLUS** regular news sections in every issue:

- Industry ■ Legal ■ Technical ■ Nuts
- Products & promotions ■ Commodities
